

renewable energy in different countries and areas. The IRENA statistics team would welcome comments and feedback on its structure and content, which can be sent to ...

Impala Energy is currently developing a project in southern Nigeria which is designed to capture flared natural gas and make use of it for commercial and industrial clients to displace their diesel consumption.

By the time the final climate deal was agreed upon by the members of the UN, Tokelau, a remote collection of Pacific atolls, had already installed three solar energy systems that have almost entirely eliminated its reliance on fossil fuels.
