

Is it cost-effective to buy solar power for home

Are solar panels worth it?

The pros of solar panels are immense, and if you can afford the upfront cost they are absolutely worth getting. With solar panels, the average three-bedroom home will save £454 a year on their energy bills. And if you're exporting excess electricity to the grid via the SEG, you'll make an additional £160 per year.

Are solar panels a good investment?

Over the past decade, the cost of solar power has halved, making it a more attractive option for homeowners. With gas prices on a rollercoaster and climate change concerns mounting, solar panels are expected to become even more cost-effective in the future. After installation, solar panels start saving you money on energy bills immediately.

Are solar panels worth it in the UK?

Solar panels are definitely worth it in the UK. The average three-bedroom household will save 70% on its electricity bills by going solar, and break even on the cost of its panels after just 15.66 years. It's a large upfront cost - but if you can afford it, solar panels make an excellent investment.

Do solar panels save money?

Solar panels not only save you money, but they can also earn you cash, all while helping to reduce the planet's carbon footprint. And they'll still generate electricity on gloomy days, which the UK experiences a lot of. So, what are the barriers stopping homeowners from installing them? Cost, mainly.

Do solar panels increase your home's value?

Multiple studies have shown that solar panels increase your home's value, rather than devaluing it. The most recent UK study revealed that buyers will pay an extra 14%, on average, if a property comes with solar panels. For the average household, this will mean a price rise of more than £40,000.

How much does it cost to install a solar panel?

Solar panels could reduce your bills and even earn money by generating electricity you can sell back to your energy company. But the average solar panel system of 3.5kWp will cost around £7,000 to install, according to estimates from the Energy Saving Trust.
