Is it expensive to install solar power on the roof

Should you install solar panels on a roof?

At first glance,the cost of installing solar panels on a roof can seem pretty expensive. You have to keep in mind that solar electricity will help to reduce your energy bill. The money you save will pay toward the cost of the panels.

How much does it cost to install solar panels?

For the average 3.5kWp solar installation,business costs will come to approximately £2,450. The remaining 10-30% of the cost goes towards labour - the people who will actually fit your panels and the associated kit. This range should cover all domestic installations,including large jobs with more than 20 panels.

How much does a solar panel cost per kilowatt?

Exactly how much a solar panel costs per kilowatt depends on the type of solar panel you're talking about. Monocrystalline solar panels are the most expensive,and their cost per kW is somewhere around £1,000 - £1,500whereas polycrystalline solar panels cost about £900 per kW.

Why are solar panels so expensive?

Panel efficiency: The more sunlight a solar panel can convert into electricity per sq metre,the more expensive it will be. Panel number: More solar panels means more materials,which means a higher cost. You can limit the number of panels you need by choosing highly efficient ones (although they may cost more).

How much do solar panels cost in the UK?

The most common type of system is the 4kW solar system,which costs between £5,000 - £6,000. It can save the average household about £660 per year,provided that they have a decent number of sunlight hours and are installed on a south-facing roof.
