

Is it good to install solar photovoltaic panels on the roof

Should I install solar panels on my roof?

If your roof faces another direction as you can likely still see plenty of benefit from installing a solar array. East and west facing roofs are also suitable for solar panels and will still see a good deal of energy generation throughout the course of the day.

Can you install solar panels on a roof in the UK?

The majority of UK homes have a roof suitable for solar panel installation. Great news for anyone looking to generate their own renewable electricity. If you'd like to speak to an MCS certified (or equivalent) solar installer for advice - you can get free no-obligation quotes from up to 4 solar installers in your area using Solar Guide.

Where should a photovoltaic system be installed?

The ideal place to put a photovoltaic system is on the rooftop, as it's generally the spot most exposed to the sun and would otherwise be unused space. But which types of roof are suitable for solar panels? The first step is to make sure you own your roof.

Can solar panels work on a flat roof?

Yes, solar panels can work just as well on a flat roof as on a pitched roof, provided they are correctly angled to capture the maximum amount of sunlight. A good racking system can tilt the panels to the optimal angle, ensuring they receive sufficient sunlight throughout the day, which maximises their efficiency.

Can a south facing roof be used for solar panels?

South facing roof panels see the sun when it is at its most intense for the longest period of time, which is why they generate the most energy. However, this doesn't mean that east or west facing roofs can't also be suitable for solar panels.

Can solar panels be installed on a north facing roof?

While it isn't recommended to have solar panels installed on a north facing roof in the UK, you can still have them installed if you wish but they won't perform as well - as we saw from the table above. So if you don't have a south facing roof, don't let that put you off the idea of renewable solar energy as it is still very much a possibility.
