

# Is it legal to charge money for solar power generation

Can you sell off excess solar energy?

One way is to install new rooftop solar panels. Doing so, from the 1st of January 2020, means you will be able to sell off any excess renewable energy. The new initiative to provide guaranteed payments comes from Smart Export Guarantee (SEG). They will enforce a legal obligation for most energy suppliers to bid for electricity.

What does the new UK solar law mean for your business?

The UK Government also plans to encourage those with rooftop solar panels to install storage batteries. The law change relates to new solar homes and to 'clean' businesses that create and export electricity to the grid. In essence, it gives solar households the right to sell renewable energy back to the suppliers.

Do you need planning permission to install solar panels?

Current rules that require businesses to apply for planning permission if solar panels will generate more than one megawatt of electricity will also be scrapped, meaning organisations will be able to install more solar panels on rooftops without the delay and cost of applying for planning permission.

How can I get paid for solar panels?

Additionally, Good Energy launched a new scheme in October 2024, which helps you get paid for the certificates (REGOs) produced when your solar panels generate electricity. Energy suppliers buy them to show that the electricity they sell is renewable.

Can solar panels lower your energy bills?

In essence, it gives solar households the right to sell renewable energy back to the suppliers. What's more, they will be able to receive 'guaranteed payments' from the biggest energy companies in the United Kingdom. So, how can homeowners lower their energy bills? One way is to install new rooftop solar panels.

Will new solar homes get a payment from suppliers?

New solar homes and businesses creating and exporting electricity to the grid will be guaranteed a payment from suppliers under new laws to be introduced by the government this week (Monday 10 June).

These cost about £12,000 to install but can save £120 per year and make a further £800 a year from selling power back to the National Grid. o Solar thermal panels ...
