What is solar edge seal tape?

Trusted by PV module manufacturers for more than 20 years, this solar edge seal tape protects cells, connections and transparent conductive oxide coatings from moisture ingress, helping improve panel longevity and maximize power.

What are photovoltaic tapes used for?

Photovoltaic tapes for the renewable energy market for bonding, venting, insulation, protection & masking. Custom rolls & die-cut shapes available.

What is pumpable solar edge tape (PSET)?

Traditionally, the edge seal process is done with a tape that seals the components together. The tape is applied manually or automatically. While tape has traditionally been the sealant of choice, a newer technology called pumpable solar edge tape (PSET) has proven itself to be a high-quality successor for this important manufacturing step.

Solar panel adhesive. Sikaflex 554. Black. Sikaflex 554 black is a super-strong solar panel adhesive. It is the most suitable adhesive for securing solar panels of all kinds. Available in black or white. If you are using our solar panel corner ...
