

# Isitepower m mab05b1 San Marino

How do I Turn Off the isitepower-m battery module?

Powering Off the System Step 1 Switch off the upstream AC input circuit breaker for the iSitePower-M system. Step 2 Set the DC SWITCH on the power module to OFF. Step 3 Hold down the manual ON/OFF switch for 5s to shut down the battery module.

Do I need a circuit breaker for the isitepower-M AC input?

AC switches (with a capacity of 40 A) must be installed for phases L and N of the iSitePower-M AC input. The AC switches are delivered with the iSitePower-M. Do not use a Type D circuit breaker because it cannot effectively protect products. No leakage protection device is required for the AC input of the iSitePower-M.

Does isitepower-m need a leakage protection device?

No leakage protection device is required for the AC input of the iSitePower-M. If a leakage protection device is configured, it is recommended that the leakage current be greater than or equal to  $100 \text{ mA} \times n$ , where  $n$  is the number of power modules. The live (L) wire and neutral (N) wire of an AC power cable must be correctly connected.

View and Download Huawei iSitePower-M user manual online. iSitePower-M network hardware pdf manual download. Also for: Map05a1, Mab05b1.

This document describes the iSitePower-M system (including the power module MAP05A1 and battery module MAB05B1) in terms of its overview, installation, commissioning, maintenance, and technical specifications.
