

Isle of Man sol connection

What is Manx Telecom doing in the Isle of Man?

Manx Telecom Wholesale team is currently well underway in their rollout of fibre broadband around the Isle of Man. The plan is to deliver fibre to 99% of properties on Island by 2024. This is a significant infrastructure project requiring investment from Manx Telecom of over £50million to reach almost 75% of properties.

Should fibre broadband be available in the Isle of Man?

Given the diversity of the Isle of Man's landscape and the remote nature of some of the properties, the Isle of Man Government recognised that delivery of fibre broadband to these areas would be commercially unviable and that funding should be made available to ensure that properties in nine intervention zones would have access to the service.
