

What is the energy policy of Uruguay?

Uruguay's energy policy, as outlined in the National Energy Policy 2005-2030, aims to diversify the energy mix, reduce dependency from fossil fuels, improve energy efficiency, and increase the use of endogenous resources, mostly renewables. The overall objective is to reduce dependency from fossil fuels and increase the use of renewable energy sources.

Why are fossil fuels mainly imported into Uruguay?

Fossil fuels are largely imported into Uruguay for transportation and industrial uses. The high import costs, and the rapid transition to renewables on the electricity grid has increasingly made fossil fuels less important. Uruguay is a petroleum - importing country, and most of the industry is controlled by the state-owned industry ANCAP.

When did Uruguay start evaluating nuclear energy?

In July 2011 the government announced that Uruguay was soon to enter Phase 1 of an evaluation of nuclear energy, [a] providing 10 million Uruguayan pesos from the national budget to hire specialist advisers, consulting the population and reviewing the human resources and technology available.

Held up as a case study for successfully transitioning away from fossil fuels, Uruguay now generates up to 98% of its electricity from renewable energy. The country offers lessons in energy sovereignty and the importance of community engagement in lowering greenhouse gas emissions. --
