

Will Ivory Coast get a 52 MW solar plant?

The Ivory Coast government has signed an agreement with infrastructure investor PFO Africa for the financing, construction and operation of a 52 MW solar plant. The project has been billed as the country's largest to date.

When will Ivory Coast's solar power plants be built?

The minister said that contracts are currently under review for the construction of other solar power plants, with a cumulative capacity of 600 MW. Commissioning of these projects will take place in 2025 and 2026. Coulibaly said the Ivory Coast's installed solar capacity currently stands at 2,907 MW.

Will Ivory Coast build a solar power plant in Bondoukou?

Ivory Coast's Council of Ministers has approved the concession agreement for the construction of a photovoltaic solar power plant in Bondoukou, in the country's northeast. The plant is due to start commercial operations in 15 months' time.

Where is Bondoukou solar power plant located?

The Bondoukou solar power plant, in the Gontougo region, will be installed on an 85-hectare site 420 km north-east of the economic capital Abidjan. The plant will be capable of injecting 87,100 MWh of electricity a year into Ivory Coast's national grid.

How much energy does the Ivory Coast have?

It currently has a capacity of 37.5 MW, but Coulibaly says this is set to expand to 80 MW, with financing for the expansion already approved by the Council of Ministers. The Ivory Coast has vowed to reduce its greenhouse gas emissions by 32% and increase the share of renewable energy in its energy mix to more than 40% by 2030.
