

Japanese solar power scam exposed

Does Japan have a problem with solar power?

A Mainichi Shimbun survey found that of all 47 prefectures in Japan, 80% have problems with solar power energy in one way or another. Known as the "sunny land" because of its many fair-weather days, the western Japan prefecture of Okayama is highly suited to solar power generation.

Does Japan have a problem with mega solar farms?

Popular opposition appears to be so strong that a 2021 survey by the Mainichi Shimbun found that 80 percent of Japan's 47 prefectures have problems with mega solar farms. Part of the problem lies in Japan's FIT system. Under the scheme, the Japanese government awards long-term contracts to renewable energy producers.

Why are Japanese solar power plants stealing copper cables?

Large-scale solar power generation facilities run by local governments across Japan have seen a succession of incidents in which copper cables for power transmission were cut and stolen. It is thought that thieves target the copper cables to sell to dealers, as prices have been rising due to Russia's invasion of Ukraine and other reasons.

Is 'megasolar' a dirty word in Japan?

'Megasolar' is a dirty word in Japan. Where do solar projects go from here? A 2-megawatt solar farm in the city of Fukushima. "Megasolar" refers to farms with a minimum output of 1 MW of electricity -- enough to power around 300 homes for a year. |Alex K.T. Martin "Megasolar opposed!! Don't make a fool of us.

Why are Japanese people rejecting mega solar projects?

As a result, electricity prices in Japan increased by 37 percent between 2011 and 2014. In addition, much of the energy harvested from mega solar farms isn't used locally; instead, it is consumed in distant urban areas. As a result, many of these communities are increasingly rejecting mega solar projects.

Why is Japan rushing to expand solar power?

*****Japan's rush to expand solar power occurred against the backdrop of the collapse of nuclear power's safety myth, caused by the March 11, 2011 meltdowns at Tokyo Electric Power Company Holdings' Fukushima Daiichi Nuclear Power Station.

The Japanese government is seeking to expand solar power by enacting subsidies and a feed-in tariff (FIT). In December 2008, the Ministry of Economy, Trade and Industry announced a goal ...
