

In this chapter, we mainly focus on the advances of flexible photovoltaic (FPV) systems. Some basics of solar cells are also briefly introduced. FPV systems based on varied ...

A large-span flexible PV support array of a 66 MW fishery-PV complementary demonstration site in the eastern coastal region of China is used as the research object. The ...

Flexible photovoltaic (PV) modules support structures are extremely prone to wind-induced vibrations due to its low frequency and small mass. Wind-induced response and ...

Renewable energy policies emphasize both the utilization of renewable energy sources and the improvement of energy efficiency. Over the past decade, built-in photovoltaic ...

In this paper, the new flexible photovoltaic support structure is summarized, and the related research articles on the structural design model and wind-induced effect of the flexible photovoltaic support structure in recent years are ...

Photovoltaic (PV) system is an essential part in renewable energy development, which exhibits huge market demand. In comparison with traditional rigid-supported ...

Due to the limitation of the traditional rigid ground photovoltaic support, a long-span flexible photovoltaic support structure composed of the prestressed cable system is being used more ...

Jinshi Zhao's 53 research works with 595 citations and 3,440 reads, including: Ultra-low power resistive random-access memory based on VO₂/TiO₂ nanotubes composite film

Flexible photovoltaic (PV) modules support structures are extremely prone to wind-induced vibrations due to its low frequency and small mass. Wind-induced response and critical wind ...

As interest in the global warming problem has increased, energy conversion devices have been extensively researched for renewable energy production such as solar ...

In this paper, we mainly consider the parametric analysis of the disturbance of the flexible photovoltaic (PV) support structure under two kinds of wind loads, namely, mean ...

In recent years, the proportion of flexible photovoltaic (PV) support structures (FPSS) in PV power generation has gradually increased, and the wind-induced response of ...

(1) Background: As environmental issues gain more attention, switching from conventional energy has become a recurring theme. This has led to the widespread ...

Jinshi Solar situated in Beilun City, it is close to Ningbo Port, which is one of the most important ports of China. Since established, Jinshi is specializing in developing, manufacturing and ...

The suspension cable structure with small sag-span ratio (less than $1/30$) is adopted in the flexible photovoltaic support, and it has strong geometric nonlinearity. Taking the tension of the cable ...

??? ? DOI: 10.12677/hjce.2023.123033 291 ???? tion of the traditional rigid ground photovoltaic support, a long-span flexible photovoltaic support
