

Leading company in solar energy Guinea

How much solar power does Guinea have?

Guinea had an installed PV capacity of just 13 MW at the end of 2020. Infracore Africa, a unit of U.K.-based Private Infrastructure Development Group (PIDG), and Solveo Energie, a unit of French renewable energy developer Solveo, have secured a 25-year power purchase agreement (PPA) for a large-scale solar project under development in Guinea.

What is the first grid-connected solar PV array in Guinea?

The solar energy facility will be the first grid-connected solar photovoltaic (PV) array in Guinea. The project is being developed by Infracore Africa with the support of Aldwych Africa Developments Ltd, in partnership with experienced French solar PV developer, Solveo Energie S.A.S, a subsidiary of Solveo Développement.

What is the 88 MW solar project in Guinea?

The project is likely the first phase of an 88 MW PV project announced by the French government in April 2017. The French authorities said at the time that the project was expected to be built in two 44 MW phases and to be developed by Solveo Energy. Guinea has had very limited development of solar energy to date.

How does solar power work in Guinea?

It combines photovoltaic solar energy with hydroelectricity produced in Guinea, reduces the need for thermal energy and reduces the cost of electricity," said Jean-Marc Mateos, President of the Solveo Group. Guinea's has a national electrification rate of 35.4%.

What is Guinea's energy plan?

Guinea's energy plan Guinea has a national electrification rate of 35.4%. Guinea's electricity supply is largely derived from hydropower, which can be susceptible to seasonal fluctuations in rainfall: 84% of businesses report power outages causing financial losses equivalent to about 4.7% of annual sales.

The Koumaguele plant will be the first grid-connected solar power plant in Guinea and will deliver 40MW of clean power to Guinea's national grid. Using existing grid infrastructure, Koumaguele will also be well-positioned to enable a ...

The Koumaguele Solar project will be Guinea's first grid-connected solar photovoltaic plant. The project is designed to complement power generation at the nearby 75MW Garafiri hydroelectric plant. The facilities will combine to maximize delivery of renewable energy to the national grid, with Koumaguele Solar expected to mitigate against the ...

The solar park will be the first grid-connected PV facility in Guinea. It will be constructed near the city of Linsan, Kindia province, working in combination with a 75-MW hydropower facility so as to enable the plant

Leading company in solar energy Guinea

to work at full capacity overnight.

GuineaSolar is a turnkey Solar Power Systems integrator. At GuineaSolar we consider everything - from the environment right through to your operational costs and bottom line. We focus on complete solar PV plants that are custom ...

Infraco Africa, a unit of U.K.-based Private Infrastructure Development Group (PIDG), and Solveo Energie, a unit of French renewable energy developer Solveo, have secured a 25-year power purchase...

UK-based InfraCo Africa and France-based Solveo Energie have signed a 25-year power purchase agreement (PPA) with Guinea's national power utility, Electricite de Guinee (EDG), ahead of the country's first on-grid photovoltaic (PV) plant being built.

The 40-MW Khoumagueli solar project in Guinea has taken a step forward with the signing of a 25-year power purchase agreement (PPA) with Electricite de Guinee (EDG).

The Khoumagueli plant will be the first grid-connected solar power plant in Guinea and will deliver 40MW of clean power to Guinea's national grid. Using existing grid infrastructure, Khoumagueli will also be well-positioned to enable a planned West African Power Pool project linking Guinea with its neighbours.

Aptech Africa, a leading renewable energy solutions provider, recently executed a significant project in Guinea, comprising the design, supply, installation, and commissioning of two PV mini-grids. These installations, sized at 103.4kWp and 21.45kWp, incorporate battery bank storage capacities of 192kWh and 33.6kWh, respectively.

As the first grid-connected solar plant in Guinea, the Khoumagueli project will diversify Guinea's national energy mix and increase installed capacity by 40MW. Khoumagueli's power will complement that provided by a nearby hydro facility, ...
