Will the Falkland Islands be able to extract oil?

Project plans to extract oil around the Falkland Islands have been on the table for some time, and the islands' government extended the licenses until the end of 2024 just last year. However, further development has recently been repeatedly hampered by economic, pandemic and political factors. Photo: Archive

Is there oil in the Falklands?

This will require further appraisal but, along with the discovery at Zebedee, the first well to be drilled in this current round, it confirms the presence of substantial reserves of oil in Falkland Islands waters - analysts predict a reserve of about 1 billion barrels of recoverable oil around the Falklands.
