Energy Minister Claude Turmes has said that photovoltaic power plants and solar power play a key role in Luxembourg's transition to environmentally friendly fuels. By 2030, the Grand Duchy must consume a quarter of its energy from renewable sources. The value of this approach is easy to assess in the current situation.

Just under 17% of the electricity consumed in Luxembourg comes from renewable energies, representing a

remarkable rise from just a few years ago. The latest report from the Luxembourg...

Luxembourg wants to accelerate the timelines for renewable energies in order to reach around 25% clean energy by 2030 and 100% in the long term. With this in mind, the aid scheme for the promotion of photovoltaic energy has been strengthened since 2019 and increasingly involves private individuals.

Die 2001 gegründete „Société Luxembourgeoise des Energies Renouvelables S.A." (Soler), an der SEO (Société Electrique de l'Our S.A.) und Enovos Luxembourg S.A. jeweils zur Hälfte ...

Solar energy has hit a new record in Luxembourg as it can now supply the total energy needs of a third of Luxembourg's population, the energy ministry said on Tuesday. The ...

La production des centrales photovoltaïques au Luxembourg a presque doublé en un an: elle a atteint un maximum de 40,1 GWh en juillet 2022, contre 23,9 GWh en juillet de l'année précédente. Avec respectivement 11,9 GWh dans le Nord du pays et 11,1 GWh dans l'Est, ces deux régions sont en tête de la production d'énergie solaire au Grand ...
