

How can Nibe help you build a more sustainable future?

NIBE combine renewable energy with smart technology in order to offer effective solutions so that together we can build a more sustainable future. Our wide range of products supplies your home with heating, ventilation, hot water and cooling, creating a perfect indoor climate with a low impact on nature.

How did Nibe develop the electric boiler?

Holger Svensson, NIBE's first product developer, accepted the challenge of solving this, along with his five-person team. This led NIBE to further develop the electric boiler and produce an exhaust air heat pump with ventilation, an electric boiler and heat recovery.

Are Nibe water heaters energy efficient?

NIBE offers households peace of mind with its reliable, energy-efficient water heaters. Washing machines and tumble dryers, which make life easier for many of us, also need to be energy efficient. They contain several components made by NIBE. Energy conservation and thermal comfort

By enabling seamless integration of NIBE devices with energy management systems, we are empowering customers to become active participants in the energy transition. Optimizing their consumption not only drives cost and carbon reductions, but contributes to the sustainability of the energy system as a whole."

NIBE Industrier is an international heating technology company. Operations are organised around three business areas - NIBE Element, NIBE Energy Systems and NIBE Stoves - all united under a shared vision: to create world-class solutions in sustainable energy. The NIBE Group has more than 5,900 employees and carries out business operations

We value our Nordic heritage by reaping the renewable energy of nature, and by combining it with new smart technology we can offer effective solutions that protect people and nature. Our wide ...

The entire indoor climate comfort system can be automated and controlled remotely using NIBE's sustainable digital solutions. Heat pumps save energy even when idle, and the units have active cooling modules that produce excellent air conditioning.
