Does Myanmar use solar power?

Myanmar has rich technical solar power potential, which is the highest in the Greater Mekong Subregion. However, in terms of installed capacity, Myanmar lags largely behind Thailand and Vietnam. Even so, the country does utilize solar power.

Who is Myanmar Solar power trading?

Myanmar Solar Power Trading Co., Ltd is established in 2011 and we are one of the leading full-service providers for C & I projects, residential, industrial and large scale solar projects in Myanmar. From a single point of contact, we provide solar PV designs, calculations, consultations, installations and repair and maintenance services as well.

Is solar energy gaining traction in Myanmar?

Solar energy is just beginning to gain some traction in Myanmar, a country that has been gradually opening up its economy and society to the world since 2011.

Where is Myanmar's first solar power plant located?

Myanmar's first solar power plant is located in Minbu, Magway Division. The plant produced 40 megawatts (MW) of electricity in its first phase of operations and will produce 170 MW once fully operational.

Who commissioned Myanmar's first commercial solar power plant?

State Counselor Aung San Suu Kyi in June 2018 officially commissioned the first, 50-MWdc/40-MWac, phase of Myanmar's inaugural commercial solar power facility, the 220-MWdc/170-MWac, US\$297 million Minbu Solar Power Plant.

Will Myanmar achieve universal electricity access by 2030?

"Following the lifting of sanctions in 2011, Myanmar launched an ambitious investment program, with both government and private sector participation, to develop its energy infrastructure and provide universal electricity access by 2030," the World Bank highlighted in its June 2019 Myanmar Economic Monitor.

Even though most electricity is produced from hydropower in Myanmar, the country has rich technical solar power potential that is the highest in the Greater Mekong Subregion; however, ...
