

Nearby beehive lockers can be placed

Where should a bee hive be placed?

Do NOT just place it in a random spot in your backyard and hope for the best. Place your beehive somewhere easily accessible, in a location that receives morning sunlight and is not subject to any substantial wind. This will protect the hive from harsh weather conditions and ensure your bees remain active.

How do you position a bee hive?

The best way to position your beehive is to put it in a location where it will get early morning sun and afternoon shade. This will give the bees the perfect temperature to work in. This will also give the bees the best chance of finding their way back to the hive when they're out foraging. You also need to make sure there is a windbreak in place.

Where should I put my beehive?

Paying attention to each one can help your bees to thrive. Do NOT just place it in a random spot in your backyard and hope for the best. Place your beehive somewhere easily accessible, in a location that receives morning sunlight and is not subject to any substantial wind.

When should a bee hive be placed?

The hive should be placed in early morning sun. This gets the bees out of their hive earlier in the day to forage. In the Northeast, hives can remain in the full sun for the entire season. However in places with warmer climates, hives should receive some afternoon shade.

What happens if you don't position a bee hive correctly?

If you don't position your beehive correctly, the bees will have a hard time finding their way back to the hive. They use the sun to orient themselves, so if the hive is in a shady spot, they can get lost. Make sure there are no trees or buildings blocking the sun so the bees can find their way home.

How to choose a hive for a bee colony?

Shelter from the wind and some degree of shade will also help keep your colony happy. The hive should be easy for the beekeeper to access but in a safe place away from the public. The following tips for hive placement will help you find the right spot for your colony.
