

# New Energy Storage Lease Conditions

How big will energy storage capacity be in 2022?

An estimated 387 gigawatts(GW) (or 1,143 gigawatt hours (GWh)) of new energy storage capacity is expected to be added globally from 2022 to 2030, which would result in the size of global energy storage capacity increasing by 15 times compared to the end of 2021.

What are the Development Goals for new energy storage in China?

The plan specified development goals for new energy storage in China, by 2025, new energy storage technologies will step into a large-scale development period and meet the conditions for large-scale commercial applications.

Does Corvus Energy lease energy storage systems?

Photo caption: Corvus Energy is now offering a global lease financing product in cooperation with Viridis Kapital to lease Energy Storage Systems (ESS) for both newbuilds and retrofits. Photo caption: Halvard Hauso, CCO of Corvus Energy believes new business models will help accelerate the shipping industry's shift to green energy.

Why do energy storage projects need project financing?

The rapid growth in the energy storage market is similarly driving demand for project financing. The general principles of project finance that apply to the financing of solar and wind projects also apply to energy storage projects.

Is leasing a new business model for ESS?

"We are pleased to offer our customers a leasing solution tailor-made to fit the operating cashflow of their business," says Halvard Hauso, CCO of Corvus Energy. "In almost all vessel segments, leasing can be a new business model for both containerized ESS solutions as well as ESSs in dedicated battery rooms," Hauso continues.

What are the key issues in a battery storage development?

The key issues are discussed below. Standalone battery storage developments typically involve a lease of the installation site with ancillary rights over the landowner's retained land (the 'Lease'). The Lease would usually be granted pursuant to an option agreement or conditional agreement for lease.
