

Where is SSE Renewables delivering its second battery energy storage system?

SSE Renewables has taken a Final Investment Decision to proceed with, and entered into contracts to deliver, its second battery energy storage system (BESS). The 150MW project is located at the site of SSE's former Ferrybridge coal-fired power station in West Yorkshire, England.

What are the Development Goals for new energy storage in China?

The plan specified development goals for new energy storage in China, by 2025, new energy storage technologies will step into a large-scale development period and meet the conditions for large-scale commercial applications.

Will SSE build a new battery storage project at Ferrybridge?

For decades the Ferrybridge coal-fired power station was a prominent feature of the West Yorkshire landscape, before being decommissioned by SSE in 2016. Now SSE Renewables' plans to build a new 150MW battery storage project at Ferrybridge will provide flexible generation for Britain's national grid and a new era for the site.

Does SSE Renewables have a battery & solar project?

SSE Renewables has almost 2GW of battery and solar projects currently in development or under construction. These technologies are key to helping SSE deliver on its Net Zero Acceleration Programme to provide the green energy we need to decarbonise. By building out more battery storage, we can get more renewable power onto the Grid.

How will UK energy storage demonstration projects help achieve net zero?

The four longer-duration energy storage demonstration projects will help to achieve the UK's plan for net zero by balancing the intermittency of renewable energy, creating more options for sustainable, low-cost energy storage in the UK.

Will Drax & SSE build a new underground power station?

The North Yorkshire-based company plans to more than double the generating capacity of its facility, nicknamed Hollow Mountain, to more than 1GW, with the construction of a new underground power station. But both Drax and SSE have been reluctant to press ahead without assurances from Whitehall.

On June 5, the Guangdong Provincial Development and Reform Commission and the Guangdong Provincial Energy Bureau issued Measures to Promote the Development of ...

On January 15, the 500MW+150MW/300MWh (energy storage) wind power project in Xinghe County, Ulanqab City was connected to the grid at full capacity, which ...

SSE Renewables has taken a Final Investment Decision (FID) to proceed with the construction of one of the UK's largest battery energy storage system (BESS) projects in Monk Fryston, Yorkshire. The 320MW / 640MWh ...

May 2024 May 19, 2024 Construction Begins on China's First Independent Flywheel + Lithium Battery Hybrid Energy Storage Power Station May 19, 2024 May 16, 2024 ...

This energy storage station is one of the first batch of projects supporting the 100 GW large-scale wind and photovoltaic bases nationwide. It is a strong measure taken by ...

On March 21, the National Development and Reform Commission (NDRC) and the National Energy Administration of China issued the New Energy Storage Development Plan During China's "14th Five-Year Plan"; ...

On December 19, the Government of the Inner Mongolia Autonomous Region issued several policies (2022-2025) supporting the development of new energy storage technologies. These policies will support ...

To facilitate the progress of energy storage projects, national and local governments have introduced a range of incentive policies. For example, the "Action Plan for Standardization ...

As the construction of new infrastructure such as 5G cell towers, data centers, and EV charging stations accelerates, many regions have used price policies and financial support policies to support the construction of ...

This document identifies energy storage as a key element of the decarbonisation of the sector and support energy security. It promotes the high-quality and large-scale development of new ...

On November 5, the Shanghai Electric Golmud Meiman Minhang 32MW/64MWh energy storage station in Golmud, Qinghai province officially went into ...

Newer Post Gansu encourages the construction of wind-solar + energy storage projects to play the role of energy storage. ... 2023 Changzhou Released New Energy Storage ...

Planning permission has been granted for a "£750m battery energy storage scheme (BESS) near Manchester. Carlton Power, the independent energy-infrastructure developer behind the venture, said...

Driven by China's long-term energy transition strategies, the construction of large-scale clean energy power stations, such as wind, solar, and hydropower, is advancing rapidly.

Located on the shores of Loch Lochy, between Fort William and Inverness, the Coire Glas project is expected to require a capital investment of over €1.5 billion to construct ...

The application guidelines are intended to focus on 7 directions and 26 guidance tasks: medium-duration and long-duration energy storage technology, short-duration ...
