Contact Solar, a solar panel company that provides and installs commercial and residential solar PV panels UK & battery storage systems.

Can a PV system be electrically installed?

Guidance exists for electrical installation of PV systems [15,16,17] but there is little equivalent guidance for mechanical installation.

Can solar panels be installed on a roof that faces north?

Solar PV panels are not recommended for a roof that faces north. You also need to consider both the age of your roof and how strong it is, as PV panels are heavy. Shade could be a big problem for solar panels, so no panels should be installed where there is shade from trees, chimneys, walls or other obstructions.

Should you install solar panels on a complex roof?

Installing panels on complex roofs can be more expensive due to the extra scaffolding and labour involved. If you decide to install a solar battery to store excess energy to use at a later time, this will also be an additional cost, separate from the solar panels.
