

# Norfolk Island powerlink battery

Why is Norfolk Island transitioning to green energy?

Norfolk Island is transitioning to green energy to reduce its dependence on diesel-fired generation, which is becoming more expensive and more difficult to source as countries around the world seek to decarbonize their economies. This initiative is comprised of several interrelated elements: Project Background

What is Norfolk Island's diesel-fired generation initiative?

This initiative is comprised of several interrelated elements: Project Background In 2022, the Commonwealth Government provided a \$5.25 million grant to Norfolk Island Regional Council to transition the island away from diesel-fired generation.

When will a new meter be installed in Norfolk?

Replacement of the island's legacy electricity meters with time of use meters began in September 2023. It is anticipated that the rollout of all new meters will take approximately six months. Council's contracted installers notify Norfolk Telecom customers by SMS weekly on the planned meter installation route for the upcoming week.
