Who owns Fos Energy LLC?

FOS Energy LLC began as "Fahud Oilfield Services" in 1999 when an initiative of His Majesty's Government encouraged the development of Omani owned companies in the well services sector. The shareholders of FOS chose Halliburton Worldwide Ltd. as its alliance partner. The Technical Services Agreement was signed in early 2000.

What types of hydrocarbons are produced in Oman?

Oman has a wide range of different reservoir conditions and produces hydrocarbons in the form of heavy oil, oil, condensate and gas. Some reservoirs contain immobile oil and special techniques have been developed to maximise recovery.. FOS has been working since 2000 on wells with H<sub>2</sub>S levels up to 7%.

Are high temperature high pressure wells drilled in Oman?

Several High Temperature High Pressure (HPHT) wells have been successfully drilled and tested over the last few years in Oman. More wells will be drilled in the future and FOS is prepared to meet the challenge of having fit for purpose equipment and experienced personnel to support the operators with these difficult and dangerous jobs.

How many PSI can a Fos separator handle?

FOS has been working since 2000 on wells with H<sub>2</sub>S levels up to 7%. During this time Well Test 3 has achieved 12 years without a Lost Time incident. We have equipment that can handle up to 15,000 psi, flow rates through our separators can be up to 3 million m<sup>3</sup> per day gas and 4,000 m<sup>3</sup> per day oil.
