

# Papua New Guinea batterie Ã©nergie renouvelable

How many people in PNG have electricity?

In the early 2000s, less than 10 percent of PNG's population had access to electricity. In recent years, the PNG government announced an ambitious target to accelerate progress - 70 percent of its people will have access to reliable electricity by 2030.

What is the USAID electrification program in PNG?

The United States has launched its PNG Electrification Program committing US\$60 million over five years and plans to make 200,000 electrical connections. Rather than fund all its projects entirely, USAID aims to use seed funding to leverage private sector investment into PNG's electricity sector.

Is there wind power in PNG?

A recent study by the International Finance Corporation highlighted the enormous potential for wind power in PNG. There are multiple locations in and around Port Moresby and coastal villages of PNG with wind speeds over 10 meters-per-second.

How does USAID invest in PNG's electricity sector?

Rather than fund all its projects entirely, USAID aims to use seed funding to leverage private sector investment into PNG's electricity sector. An initial US\$57 million was allocated for this purpose and the project is looking to generate investment worth US\$200 million.
