Customer Questions and Answers

Do solar panels provide electricity 24/7?

Solar PV panels alone will not provide electricity 24/7. You would need alternative energy sources or a battery system in addition to solar PV panels to come off the grid. Will my solar panels work during a power cut?

What factors should be considered when choosing solar panels?

Factors such as the roof orientation, shading from nearby objects, and the specific location's latitude and climate should also be taken into consideration when determining the best direction for solar panels. 38. What are solar panels made of? Solar panels in the UK are primarily made of silicon solar cells.

Can solar panels generate electricity on cloudy days?

Yes, solar panels can still generate electricity on cloudy days. While direct sunlight is ideal, solar PV panels can convert the sun's radiation into electricity, even in less sunny conditions. Do I need a south-facing roof for solar panels?

Can a 4KW solar PV system take you off the grid?

With battery storage, a 4kW solar PV system (around 10 - 12 panels) for example, could potentially take you fully off the grid in the summertime, reducing your vulnerability to energy price fluctuations. When asking for this cost, also ask for a detailed breakdown of all costs of the installation. 4. What will my payback period be?

How many solar panels do you need for a UK Home?

The number of solar panels required for a UK home depends on the size of the property and the energy needs of the household. A typical 4kWp solar panel system requires around 16 panels, which can generate between 3,200 and 4,000 kWh of electricity per year, according to the Energy Saving Trust.

What is a solar PV system?

Solar electricity refers to the generation of electricity using solar photovoltaic (PV) technology. capture the sun's renewable energy and convert it into usable electricity. How does a solar PV system work? A solar PV system utilises an array of cells containing solar PV material that converts sunlight into direct current (DC) electricity.
