

Greece will launch a public call next month for subsidies for rooftop photovoltaics paired with batteries. The program is for households, small firms and farmers. The aim is to add at least 250,000 such units.

Greece's Ministry of Environment and Energy has revealed a new EUR200 million (\$215.3 million) subsidy program for solar projects and small storage systems in the residential and agricultural ...

RWE and PPC have announced the final investment decision for the construction of a 450 MWp solar plant in Greece through their joint venture, Meton Energy S.A. RWE has ...

The photovoltaic system subsidy starts at 45% and reaches 75% for households. The corresponding percentages for farmers are 40% - 60%, while the total subsidy of the ...

Greece has already run two tenders awarding about 700 MW of battery storage projects. A call for the program's third tender, targeting specifically battery systems in former coal mining...

Greece's goal is to reach about 3.5 GW in battery storage by 2030 to support its ever-increasing renewables fleet. So far, the first two auctions for standalone batteries have ...

The photovoltaic system subsidy starts at 45% and reaches 75% for households. The corresponding percentages for farmers are 40% - 60%, while the total subsidy of the solar battery system can reach up to 16,000 euros for households and 10,000 euros for farmers.

The Greek government is opening for submissions in April a new subsidy programme targeting the installation of small solar photovoltaic (PV) systems and batteries in the residential and agricultural segments.

In 2022, Greece will launch the largest solar power plant construction project in the Eastern Mediterranean, with photovoltaic facilities worth up to 130 million euros. This 205-megawatt power plant will generate enough electricity to power 75,000 households and will reduce more than 300,000 households per year. tons of carbon dioxide emissions.

The subsidies for the new "Photovoltaics on Roofs" program will be directed exclusively to photovoltaic systems that incorporate a battery, with the latter being 100% subsidized, while the total subsidy will cover 60% of the cost, Environment and Energy Minister Kostas Skrekas says in an interview with Kathimerini.

Greece has already run two tenders awarding about 700 MW of battery storage projects. A call for the program's third tender, targeting specifically battery systems in former ...
