How do I install a solar photovoltaic system?

Installing solar photovoltaic systems requires specialized skills and knowledge. Installation should only be performed by qualified personnel. Before installing a solar photovoltaic system, installers should familiarize themselves with its mechanical and electrical requirements.

Which materials should be used to install photovoltaic modules?

JA Solar recommends that when installing modules at the seaside, stainless steel or aluminum materials should be used to contact the photovoltaic modules, and the installation parts should be well protected from corrosion. The tilt angle of the modules is measured between the surface of the modules and a horizontal ground surface.

Can a PV module be deformed during installation?

The aluminum frame of the PV module shall not be deformed during installation, and the front of the module shall not be covered. Each PV module needs to be fixed with at least four clamps, and the applied torque is $16\text{N} \cdot \text{m} \sim 20\text{N} \cdot \text{m}$.

What conditions should a solar PV module be installed in?

Risen module should be installed in the following environmental conditions. -20°C to $+50^{\circ}\text{C}$.
Remarks: The working environment temperature is the monthly average maximum temperature and minimum temperature of the installation site. The mechanical load bearing capacity of the solar PV module is determined based on the installation method.

Where should a solar PV module be installed?

For most places, Risen solar PV modules should be installed where the sunlight can be maximally acquired throughout the year. In the Northern hemisphere, the light-receiving surface of the module is usually selected to face the South; in the Southern hemisphere, the light-receiving surface of the module is usually selected to face the North.

How to install a photovoltaic light fixture?

The fixture shall be installed within the scope authorized by Suntech. The inside side of the fixture and the side of the photovoltaic module should be completely fitted. In any fixture installation mode, the fixture must not touch the glass or deform the frame of the bracket or module.
