

# Photovoltaic panels installed on concrete roof

Can I install solar panels on a concrete tile roof?

Some companies may tell you that you can't go solar or that they won't do the install, but that is not the case. If you have a concrete tile roof, there are two common ways to go about installing solar panels on a concrete tile roof. First, your installer can put S-hooks under the tile for your system to be mounted on.

Can solar panels be installed on a slate roof?

There's more work involved than with asphalt tiles, but solar panels work just fine on slate and concrete tile roofs. Clay, slate, and concrete tiles are usually removed and replaced during solar panel installation.

Can solar panels be installed on a commercial roof?

If you're considering installing a residential or commercial solar panel system, you might wonder if your roof type is appropriate for a solar installation. The good news is that solar panels can be installed on just about any roof type, but the installation process and mounting hardware might vary from material to material.

Can you install solar panels on a flat roof?

Ballast systems are simply a weighted racking setup that holds solar panels in place. If you need to drill into your flat roof to install solar panels, don't worry - your solar installer will ensure that the holes they drill are as small as possible and sealed correctly to avoid roof damage or leaking. Can you install solar panels on wooden roofs?

How do you install solar panels on a roof?

Your installer would temporarily remove the tiles, install the hooks underneath into the roof, then put the tile back over the mount, and rack the system from there. The second option is called a comp-out, where your installer will remove the tiles where you intend to put solar, then lay down composite shingle to install the array.

Can you make a whole roof out of solar panels?

It is possible to create a whole roof out of solar panels using an in-roof system. Making the whole roof out of solar panels can be a fantastic option as installing solar panels is an asset to the home because of the savings in electricity and feed-in tariff payments. Why not consider making it your total roof covering?

**Ballasted (weighted) Installation.** In a ballasted installation, the PV array is not fixed to the roof but is held in place by weights, often concrete blocks. A calculation is made for the ballast weight required to hold the PV array on the ...
