

Pipps energy El Salvador

Will EDP introduce a new source of thermal energy to El Salvador?

EDP will introduce a new source of thermal generation to El Salvador through power purchase agreements with seven of the country's distribution companies.

How has EDP impacted El Salvador?

The project has also been a catalyst for job creation and growth in the country. EDP employed 2,000 workers during peak construction and created 80 full-time operations jobs. In total, the project represents an approximately \$1 billion investment in El Salvador.

When did El Salvador's EDP power plant start operating?

Despite the enormous challenges, including supply-chain disruptions, travel restrictions, airport closures, global financial volatility, and Salvadoran COVID-19 mitigation measures and regulations, the power plant began commercial operation in October 2022. EDP is a transformative investment in El Salvador's clean energy future.

How does electricity work in El Salvador?

From there, the gas powers 19 internal combustion engines and waste heat feeds one steam turbine. Two 230-kV electric transmission lines, one of which connects to the Central American Electrical Interconnection System, provides added grid reliability to the region and opens further opportunities for renewable energy in El Salvador.

Does El Salvador use natural gas?

The plant's use of natural gas will reduce the amount of imported diesel and heavy fuel oil fired generation in El Salvador's electricity mix, resulting in significant environmental benefits for the country and the region.

How much money is invested in El Salvador?

In total, the project represents an approximately \$1 billion investment in El Salvador. At least \$10 million will be invested in economic and social works during the term of the power purchase agreements, strengthening local communities with a more than \$500,000 investment per year.

EDP is a transformative investment in El Salvador's clean energy future. The project is delivering approximately 30% of the country's energy demand with clean power and has modified the Salvadoran energy matrix by incorporating natural gas for generation and other uses, reducing the country's reliance on diesel and heavy fuel oil-fired ...
