

Who is endoks?

Today Endoks is an international brand having achieved its goal of becoming a competitive, reliable, and leading provider of high-quality solutions, a technology developer, and a company blazing the trails in power quality, energy digitalization, and energy efficiency, renewable energy.

How can Portugal meet growing energy demands in a sustainable way?

Meanwhile, the rapid expansion of hydroelectric and solar energy capacity is helping Portugal meet growing energy demands in a sustainable way. These efforts align with European Union objectives, such as the RePowerEU plan and the Renewable Energy Directive, which targets 42.5% renewable energy in total consumption by 2030.

What percentage of electricity is produced in Portugal?

In 2019, electricity covered 25% of the total final energy demand, 56% of building energy demand, and 25% of industry energy demand, according to IEA. A significant portion of the electricity in Portugal is produced through a renewable source, over 50%. Wind power amounted to 24% of the electricity production.

Does Portugal have a high level of electrification?

Portugal has a high level of electrification. In 2019, electricity covered 25% of the total final energy demand, 56% of building energy demand, and 25% of industry energy demand, according to IEA. A significant portion of the electricity in Portugal is produced through a renewable source, over 50%.

Will offshore wind power reduce Portugal's energy dependence?

The Portuguese Minister of Environment and Climate Action Duarte Cordeiro claimed that developing hydrogen and offshore wind power will allow the country to reduce its energy dependence.

How has Portugal changed its energy policy?

Despite a difficult economic climate, Portugal has continued to develop and reform its energy policies. These changes have resulted in greater economic activity in the energy sector, increased renewable energy deployment, further market liberalisation and

Endoks has become the leading company in MV power quality industry, where only multinational firms had been operated until recently. In 2011, Endoks has partnered with "Quality Power", one of the world largest manufacturers in the production of MV air core reactor, and began to offer its products and services to 45 countries using the existing franchises and liaison offices. By the ...

Portugal's energy and climate policies aim to reach carbon neutrality primarily through broad electrification of energy demand and a rapid expansion of renewable electricity ...

Total final consumption (TFC) is the energy consumed by end users such as individuals and businesses to heat and cool buildings, to run lights, devices, and appliances, and to power vehicles, machines and factories. It also includes non-energy uses of energy products, such as fossil fuels used to make chemicals.
