More than 90% of solar capacity in Puerto Rico will come from distributed resources . While the utility-scale market has gained some traction over the past few years, the distributed segment will largely drive solar growth in Puerto Rico. We forecast that more than 5. GW of solar capacity will be installed in Puerto Rico over the next 10 years.

The Donoe solar farm in St. Thomas, U.S Virgin Islands was originally built in 2015 but sustained significant damage during the 2017 hurricane season. In 2019, BMR Energy agreed to acquire the site of the original solar farm and closed on the purchase in 2020.
