

Hitachi Energy announced it has delivered its grid connection solution for Qatar's Al Kharsaah solar photovoltaic (PV) power plant - one of the world's largest and the country's first utility-scale solar PV park, 80 kilometers west of Doha - which was inaugurated by His Highness Sheikh Tamim bin Hamad Al Thani, Amir of the State of Qatar.

Qatar targets 20% of its electricity being generated from renewable sources by 2030, and a carbon zero footprint by 2050. This strategy has and will continue to drive significant investment in renewable energy infrastructure. Qatar's current primary renewable energy focus is solar energy and waste-to-energy sources. Solar power

This Marubeni investment-backed plant, which was inaugurated on October 18, is the first large-scale solar power generation project in Qatar, with a maximum output of 800 MW. The power generated will be sold to Qatar's General Electricity & Water Corporation Kahramaa under a long-term contract of 25 years.

QNRES recommends the installation of distributed solar generation up to around 200 MW by 2030. This distributed generation capacity will enable more localized power generation, reducing strain on the centralized grid infrastructure and enhancing energy resilience.

The strategy, introduced by Qatar General Electricity and Water Corp., known as Kahramaa, aims to diversify and increase the use of renewables, especially solar energy, in the Gulf state and integrate it into the electricity mix, Kahramaa said as cited by the state-owned Qatar News Agency (QNA).

Along with Al Kharsaa Solar PV Power Plant, which is currently under construction, the IC Solar project will increase Qatar's renewable energy generation capacity to 1.675 GW by 2024. The project will utilize high-efficiency bifacial modules mounted on single-axis trackers as well as cleaning robots that will operate daily to minimize losses ...

QatarEnergy announced awarding the Engineering, Procurement and Construction (EPC) contract for its industrial cities' solar power project (IC Solar). This project includes 2 large-scale photovoltaic (or PV) solar power plants to be built in Mesaieed Industrial City (MIC) and Ras Laffan Industrial City (RLIC) and is expected to start ...

QNRES recommends the installation of distributed solar generation up to around 200 MW by 2030. This distributed generation capacity will enable more localized power generation, reducing strain on the centralized ...

Qatari state-owned petroleum company QatarEnergy has unveiled plans to build a new 2GW solar power

Qatar rentech solar

project in Qatar's Dukhan area. The initiative is expected to more than double Qatar's solar energy production capacity, while significantly contributing to the nation's lower carbon emissions.

Electro-Mechanical Co.W.L.L-QATAR (QEMC) has secured the Mechanical, electrical and plumbing (MEP) works contract for an 800.75MW solar plant project in Qatar. The nine-month contract, awarded by Samsung C& T, emphasizes QEMC's commitment to delivering top-notch engineering solutions, especially in large-scale solar initiatives.

QatarEnergy has unveiled plans for a 2 GW solar project in western Qatar, which will more than double the country's cumulative installed solar capacity.
