How would a radio program help students learn?

Students, in traditional classroom settings (or individually via distance education) could listen to programs, or with the use of transceivers, could interact with radio programs. In this manner, students would receive educational programming that expanded on their classroom learning.

What is broadcasting as a medium of Art?

It traces the development of radio and television broadcasting, surveys the state of broadcasting in various countries throughout the world, and discusses the relationship of the broadcaster to government and the public. Discussion of broadcasting as a medium of art includes a description of borrowings from other media.

How did educational radio develop?

While educational radio developed in different forms depending on the country and specific conditions, its primary goal was to complement and improve existing educational programs (Bagley, 1944, p. 257).

How many radio stations were there in 1922?

By 1922 there were thirty radio station transmitters and 60,000 receivers in use (Ackerman, 1945, p. 2). The number of radio transmitters and receivers in the United States continues to increase such that in 1942, Seerley Reid stated that "radio is an indispensable and indisputable part of American life" (p. 115).
