

Ranking of wind turbine generators in China

Are Chinese wind turbines the world's top wind power manufacturers?

Chinese wind turbine makers continue to pace the global market, taking four of the top five spots in a ranking of the world's top manufacturers of both onshore and offshore wind power equipment. Research from BloombergNEF (BNEF) published March 27 showed global wind power generation capacity additions hit a record 118 GW in 2023.

Which wind turbine manufacturers dominated the global wind market in 2023?

Four Chinese wind turbine original equipment manufacturers (OEM) claimed positions in the 2023 global top five as China dominated the wind market last year, with Goldwind Science & Technology (SHE:002202) ranking number one for the second consecutive year with a record 16.3 GW installed, according to an analysis from Wood Mackenzie.

Which country has the most wind turbines in 2023?

China accounted for 65% of global wind capacity in 2023, which pushed four Chinese wind turbine original equipment manufacturers (OEM) into the top five global rankings, a first for the sector. With a record of 16.3 gigawatts (GW) capacity installed, Goldwind maintained the leading position for the second consecutive year.

Who commissioned the most wind turbines in China last year?

Xinjiang Goldwind Science & Technology (SHE:002202) retained the top spot with 16.4 GW of projects commissioned last year. Envision Energy rose to second place with 15.4 GW, while Denmark's Vestas Wind Systems A/S (CPH:VWS) ranked third with 13.4 GW. Windey and Mingyang rounded off the top five.

Who makes the most wind turbines in the world?

The top five for wind turbine makers was dominated by Chinese manufacturers. Xinjiang Goldwind Science & Technology (SHE:002202) retained the top spot with 16.4 GW of projects commissioned last year. Envision Energy rose to second place with 15.4 GW, while Denmark's Vestas Wind Systems A/S (CPH:VWS) ranked third with 13.4 GW.

Are Chinese wind turbine makers expanding to foreign markets?

According to the report, Chinese turbine makers are not only showing their prowess in domestic markets but are also expanding to foreign markets. In 2023, Chinese firms commissioned 1.7 GW of wind projects in 20 markets overseas, including five EU member states, almost three times as many markets as in 2018.
