Rwanda has High solar irradiance, with 1890kWh/per sqm in the eastern provinces. Gigawatt global has developed the first biggest utility-scale; grid-connected, IPP and commercial solar field in East Africa; the 5MW solar power plant located in Rwamagana, Rwanda Eastern province is operational since 2015.

Supports Rwanda's conditional updated NDC (2020) targets to reduce GHG emissions by 38% and install 68MW of solar PV mini-grids in rural areas by 2030. Project is in line with Rwanda's long-term development plan, Rwanda 2050, as well as the National Strategy for Transformation (2017-2024), which aims to ensure 100% electricity access by 2035.

The Government of Rwanda (GoR) has set an ambitious target of universal access to electricity by 2024, with 52% of the population to be reached by the grid and 48% of the population by off-grid solutions.

The Government of Rwanda through BRD in collaboration with the World Bank, and Swedish International cooperation agency SIDA have launched a subsidy window and Guarantee framework to provide credit facilities to SACCO's, Banks and microfinance institutions that will lend to households for off-grid connections.
