The Smart Rwanda Master Plan has facilitated the development of a robust ICT infrastructure across the country. This includes the expansion of high-speed broadband networks, the ...

The digital infrastructure revolution in Rwanda, encompassing nationwide 4G LTE coverage, extensive fiber optic networks, and smart city initiatives in Kigali, has positioned ...

KIGALI, July 22, 2021--The latest World Bank Rwanda Economic Update notes that private infrastructure financing will have to increase sharply from its current share of about one-third of total infrastructure commitments. This will be critical for the country to achieve her development ambitions, the report says, to reduce debt levels and reach the Sustainable Development Goals.

These include the comprehensive monitoring of power grid infrastructure and power stations for capacity and security, water leak monitoring and environmental monitoring, with sensors being deployed in buildings to build a picture of air quality across the city.
