

# Saint Helena home ups battery

Compact desktop UPS with silent alarm provides battery backup support for your home/office network system or digital signage components. Protects equipment against blackouts, brownouts, overvoltages, surges and line noise

Battery capacity (usually denoted by the power rating in watts) should be the primary focus when getting a UPS. A sub-1000W UPS should be good enough for most appliances, but if you have really powerful systems like a gaming rig, you might want to look beyond the 1000W mark.

UPS Battery Backup. Tripp Lite UPS systems cover a wide range of applications, including SmartOnline and SmartPro UPS systems for rack mount battery backup in server rooms and data centers, desktop UPS systems for computers and peripherals, and many UPS systems for special applications such as retail, gaming and industrial.

Replace your device's original AC adapter with this 36W mini UPS system and add battery backup power to keep modems and security cameras running during prolonged power outages.
