

Saint Lucia pe energy ltd

Why do you want to be a St Lucia energy company?

LUCELEC aims to be a St. Lucia energy company that delivers efficient energy services that are safe, reliable, and environmentally responsible. We meet the expectations of our customers, shareholders, and employees and are a catalyst for social and economic development in St. Lucia. Our vision is to be the energy that powers our nation's success with core values of Accountability, Excellence, Caring, and Ethics.

How many employees does St Lucia Electricity Services Limited have?

St. Lucia Electricity Services Limited employs approximately two hundred and forty-three (243) persons. It serves a customer base of nearly 60 000, consisting of residential, commercial, and industrial customers. The company is committed to recruiting, training, and retaining a talented staff force.

How much electricity does Saint Lucia have?

LUCELEC has an installed electricity generating capacity of 78.4 megawatts (MW), with peak demand of 60 MW. Most of the island's energy is produced from imported diesel fuel that powers electrical generators. Saint Lucia's electricity rates are more than triple the U.S. average.

Is Saint Lucia reliant on fossil fuels for electricity generation?

Like many island nations, Saint Lucia is almost 100% reliant on imported fossil fuels for electricity generation, leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity.

Electricity Sector Data

Is LUCELEC's metering infrastructure reducing Saint Lucia's electrical losses?

Advanced metering infrastructure installed across 20% of LUCELEC's customer base in 2010 reduced technical and nontechnical electrical losses. Despite these efforts, Saint Lucia's transmission losses remain moderately high at more than 9%.

How much geothermal potential does Saint Lucia have?

The volcano that sits in the middle of Saint Lucia provides vast geothermal potential. Conservative estimates indicate more than 30 MW of technical geothermal potential; others estimate 170 MW. Estimates also show that development of this geothermal resource would likely be economically feasible.
