

Saudi Arabia nge energies solutions

How much power does Saudi Arabia need?

Saudi Arabia has established a goal to source at least 50 percent of its power from renewable energy by 2030, expanding its capacity to 130 gigawatts (GW), 58.7 GW of which is expected to come from solar and 40 GW from wind. This target is the most ambitious of its kind among Gulf Cooperation Council (GCC) countries (Figure 1).

Will Saudi Arabia invest \$10 billion in green hydrogen?

Dubai: Saudi Arabia's Public Investment Fund (PIF) launches a new entity aimed at investing approximately \$10 billion (Dh36.7 billion) in green hydrogen production. The new subsidiary, called Energy Solutions Company, will concentrate on financing the development of low-carbon fuels, as reported by Bloomberg.

What makes Energia a great company?

We are focused on empowering lives and illuminating a brighter, more promising future. Energia's story is one of visionary leadership and commitment to delivering top-tier energy solutions for achieving outstanding outcomes.

Saudi Arabia's energy strategy focuses on maximising returns from hydrocarbons while expanding renewable energy capacity. Acknowledging peak oil demand could occur before 2030, the Kingdom is investing in clean energy solutions. With plans to produce 50% of its energy from renewables by 2030, Saudi Arabia is diversifying its energy mix. The National Renewable ...
