

Selling solar energy storage panels

Should you store or sell unused solar energy?

There are several benefits to storing or selling unused electricity generated by solar panels. These options allow homeowners to make the most of their solar energy systems and earn money through net metering or feed-in tariffs.

Can you get money from solar panels?

As a homeowner with solar panels, you may be able to receive payments for any excess solar energy you send back into the grid. Since 2019, the government have backed various schemes to help those who produce renewable energy, to benefit from sending their surplus into the national energy supply.

How do I sell solar power back to the National Grid?

This scheme was replaced by the Smart Export Guarantee (SEG), now the most common method of selling solar power back to the National Grid. To start benefiting from this government-supported scheme, you first need to register for the SEG tariff through an approved energy supplier.

How much does a solar battery cost?

Batteries cost from £4,818 (or £3,057 if you buy them with solar panels). So Energy sells both AC and DC batteries ranging from 5kWh to 25kWh, starting from £4,817. There's a £1,500 discount if you buy solar panels at the same time. British Gas, Good Energy and Octopus Energy also sell storage systems as part of their solar panel packages.

Is it worth getting a solar storage battery?

A solar battery allows you to store electricity produced by your solar panels and use it later or, in some cases, sell it back to the grid to make a few quid - but they're not cheap. Read on to see if it's worth getting a solar storage battery for your home... This is the first incarnation of this guide.
