

In the last two years, two-thirds of the country's solar power generation installations have been connected to the grid. Aim to meet EU renewables targets. The ...

In 2023 Slovenia added 400 MW in solar power, exceeding 1 GW in total capacity. The country also entered the list of the top ten European Union member countries in installed solar power per capita. At the end of 2022, Slovenia had solar facilities of an overall 697.7 MW, and with last year's expansion the level reached 1,101.5 MW, the ...

Slovenia recorded 400 MW of new PV installations in 2023, taking its total installed capacity to 1.1 GW, according to figures from the Ministry of the Environment, Climate and Energy.

The Ministry of Infrastructure is drafting a plan to install a new 1,000MW (1 GW) solar PV capacity in Slovenia with the support of the national transmission system operator ...

In 2020, a total of 11,990 solar power plants with a total electrical capacity of 371.6 MW were installed. Their production in the same year amounted to 289.5 GWh or about two percent of the total electricity production in Slovenia. This energy is sufficient to cover just under nine percent of Slovenian household electricity needs.

In 2023 Slovenia added 400 MW in solar power, exceeding 1 GW in total capacity. The country also entered the list of the top ten European Union member countries in installed solar power per capita. At the end of ...

The EUR2 million (\$2.4 million) solar park is being deployed on a slope of the left bank of the drainage canal at the Zlatolicje hydroelectric power plant, which accounts for more than one-fifth ...

Hydropower plant operator Hidroelektrarne na spodnji Savi (HESS) has officially opened Slovenia's biggest solar power plant, with an installed capacity of 6 MW. Together with the Brezice hydropower plant, it makes a hybrid system. At the same time, Brezice's water reservoir will provide energy storage.

In the last two years, two-thirds of the country's solar power generation installations have been connected to the grid. Aim to meet EU renewables targets. The national programme for the use of EU cohesion funds for the period 2021-2027 sets aside EUR60 million for solar electricity generation.

In 2020, a total of 11,990 solar power plants with a total electrical capacity of 371.6 MW were installed. Their production in the same year amounted to 289.5 GWh or about two percent of the total electricity production in Slovenia. This ...
