

Is Sunny Boy Storage available for commercial use?

(Update 4/2/2019 - multibattery functionality) Starting in June, the powerful SMA battery inverter Sunny Boy Storage 3.7/5.0/6.0 for private homes will be commercially available. In this post, you will learn how to install and commission the Sunny Boy Storage in a few steps and what makes the device so special.

How many SMA inverters can a Sunny Boy Storage Control?

The Sunny Boy Storage is able to control the output for a maximum of 3 additional SMA inverters. For systems which do not use a Sunny Home Manager, it is recommended to connect the SMA Energy Meter directly to the Sunny Boy Storage. At the moment, only one Sunny Boy Storage can be installed per solar system.

How does Sunny Boy Storage work?

With its smart capabilities, the Sunny Boy Storage is able to limit export of energy to the grid not only for itself, but also for up to three SMA PV inverters. Configuration of the Sunny Boy Storage One advantage of the Sunny Boy Storage and its AC-coupling is it provides flexibility for deciding where to install the battery and inverter.

Can a Sunny Boy Storage be installed without a home manager?

For systems which do not use a Sunny Home Manager, it is recommended to connect the SMA Energy Meter directly to the Sunny Boy Storage. At the moment, only one Sunny Boy Storage can be installed per solar system. In a three phase system, the Sunny Boy Storage is connected to one of the phases.

Where can I find information about the Sunny Boy Storage?

The datasheet on the Sunny Boy Storage and the product page provide an overview of the technical data and the options the Sunny Boy Storage offers. You will find installation and wiring instructions in the operating manual. 2. In which countries is the Sunny Boy Storage available?

How many battery connections does the Sunny Boy Storage have?

With three battery connections in total, the Sunny Boy Storage grows with the individual needs of its users. Maybe in the near future, you want to charge your electric vehicle in a climate-neutral manner and for free with electricity from your own PV system. Or you want to supply a heat pump with self-generated solar power.

You can either choose the Sunny Boy Smart Energy with integrated battery or the Sunny Boy Storage for high-voltage batteries such as the Tesla Powerwall or a Sunny ...

Setting up Zero Export with the Sunny Boy Storage. Export limitation for a PV system can be achieved with the Sunny Boy Storage and SMA inverters with Webconnect functionality. For an export limitation solution you will need: Sunny Boy Storage; SMA Energy Meter; Sunny Boy or Sunny Tripower with Webconnect
