

The main innovation of this project is that it aims to bridge the gap between all the stakeholders of the future liberalized energy market and apply the regulations instructed from the regulatory authorities in a single framework, the EnergyXchange platform.

Cluster on Renewable Energy Communities; Knowledge Cluster on Improving services through digitalisation; Smart Villages Taskforces; European Stakeholder Platforms. ... Please find further information about Smart Villages support in Cyprus on the Smart Rural 21 project's ...

In order to make the smart energy transition a reality, 19 projects came together under the #SmartEnergyCluster to mutually support each other by building on and multiplying all their results. MATRYCS was represented by our partner from SEVEN, Michal Stasa, who presented the project at the 1st Collaboration meeting of the cluster, which was ...

Elevate your home with Smart Solar Cyprus and start seeing returns on your investment in as little as three years. Harness the abundant Cyprus sun and let it work for you, cutting costs and ...

The research partners ran a number of case studies focused on the entire solar energy cycle, from PV cells and energy storage to smart electricity grids and energy forecasting. The overall aim was to find ways to use more renewable energy on the island and end Cyprus' reliance on crude oil.

Elevate your home with Smart Solar Cyprus and start seeing returns on your investment in as little as three years. Harness the abundant Cyprus sun and let it work for you, cutting costs and supporting the environment. Our efficient solar solutions mean quick savings and lasting benefits.

Energy-saving blockchain technology, replacing outdated electric motors and integrating smart energy services are among the LIFE projects forming a new #SmartEnergyCluster aimed at achieving a sustainable and efficient energy system.

#SmartEnergyCluster is a collaborative effort of more than 20 EU projects focused on merging different energy services and incorporating non-energy benefits whilst ...

CRETE VALLEY will demonstrate a digitalised, distributed, renewable, low carbon landscape that is affordable for all and fully covers the local energy needs on an annual basis, utilizing multiple renewable energy ...
