

Smart grid connect Georgia

The electric cooperative is teaming up with Conexon Connect to launch and deploy a 1,900-mile fiber-to-the-home (FTTH) network providing high-speed internet access to 4,800 members in Dooly, Houston, Macon, Pulaski, Turner, Wilcox and Ben Hill counties in central Georgia.

Central Georgia Electric Membership Corporation (CGEMC) and Conexon Connect celebrated their inaugural "fiber lighting," last week connecting Monroe County and Conexon Connect's first broadband customer on the new fiber network.

The electric cooperative is teaming up with Conexon Connect to launch and deploy a 1,900-mile fiber-to-the-home (FTTH) network providing high-speed internet access to ...

Why is the Smart Grid Important? Enhanced Reliability and Resilience: The smart grid's advanced monitoring and automated response capabilities can quickly identify and address problems like severe weather and cyber attacks, minimizing the impact of outages and ensuring a more stable power supply.; Minimized Outage Impact: Smart devices can detect ...

smart grid capabilities to the co-op's electrical infrastructure. "Over the past year, we have announced the completion of three EMC fiber broadband projects in Georgia. ...

"With the addition of the Ocmulgee EMC fiber network, Conexon will be building 200 miles a week in the state, making service available to previously unserved rural Georgia at a pace of 1,000 to 2,000 homes a week. I know there are others building in Georgia, but there's a difference between these Connect projects and nearly all the others.

Not only does it provide new opportunities through access to fiber broadband, but also for smart grid technologies to strengthen our electric system.

Additionally, it will provide reliable, clear phone service and enable the benefits of smart grid capabilities to the electrical infrastructure, including improved power outage response times, better load balancing, more efficient electricity delivery and other benefits. ... "Thanks to Middle Georgia EMC and Conexon Connect, our children ...

Governor Kemp announced that Washington EMC will form a new partnership with Conexon Connect to provide high-speed fiber internet to more than 12,000 homes and businesses in 10 Middle Georgia counties--Baldwin, Emanuel, Glascock, Hancock, Jefferson, Johnson, Laurens, Warren, Washington and Wilkinson.

Smart grid technology will offer the EMC benefits such as improved power outage response times, better load balancing, and more efficient electricity delivery. Conexon Connect will lease excess fibers of the network to meet the critical need for high-speed internet among rural Georgia residents with fiber to the home.
