

Why is Spain launching a solar subsidy?

Spain follows suit with the Netherlands which launched a subsidy aimed at solar module and battery manufacturing. In both cases, these schemes come at a time when the European solar manufacturing industry has been in a critical state, with many in the sector calling for emergency measures to protect European industry.

Are solar panels a good investment in Spain?

BARCELONA - Installing solar panels on your home in Spain can be expensive. However, you can significantly reduce that large investment by using subsidy schemes the Spanish government has introduced to stimulate the self-consumption of clean energy. Solar energy in Spain has reached more than 12,400 MW of installed capacity in 2022.

How much does a solar system cost in Spain?

Subsidies based on these funds can be applied for until 31 December 2023. Depending on the type of installation and the power of the system, these are the established amounts for a single-family home in Spain: Subsidies of EUR600 per kWp for installations with a capacity of less than 10 kWp (most common) and EUR490 on the battery.

Why are people turning to solar energy in Spain?

The increasingly unpredictable changes in electricity prices has meant more and more people in Spain are turning towards solar energy. After all, installing solar panels can reduce their electricity bills by at least 50%. The fact that the government awards subsidies at the state, regional and municipal levels provide an additional incentive.

Why should you choose solar panels for your home in Spain?

The fact that the government awards subsidies at the state, regional and municipal levels provide an additional incentive. Moreover, with solar panels, you also contribute to a more sustainable planet. Related post: Everything about solar panels for your home in Spain

Are solar panels tax deductible in Spain?

Another interesting subsidy that stimulates the use of solar energy for self-consumption in Spain is the income tax deduction. Each year, a multitude of drafts can be deducted from your taxable income. However, many people do not know that the costs of installing solar panels can also form a deduction.

Spain follows suit with the Netherlands which launched a subsidy aimed at solar module and battery manufacturing.
