Who produces solar energy in France?

An expert in photovoltaic and agrivoltaic development, TSE is one of the main producers of solar energy in France. Created in 2016, our solar farms represent the equivalent of the electricity used by 155,000 people annually. In 2021, TSE inaugurated the Marville photovoltaic power plant, the second largest power plant in France.

Can I lease my land for a solar farm?

Leasing your land for a solar farm can help you create a steady income for 25+ years. Contact us today and find out if your land is suitable for a solar farm.

Does proximity to solar farms deter agricultural sales?

Proximity to solar farms also has not been found to deter the sales of surrounding agricultural or residential land. Solar farm development acts as a tool to preserve existing agricultural lands and allow the soils to rest and renew for future reintroduction into agricultural production.

Does a landowner have to maintain a solar farm?

The landowner receives annual lease payments and has no obligation to maintain the solar farm. The team at OYA believes in long-term, trusted partnerships with landowners that are built on integrity and reliability. Our knowledgeable project developers will guide you through each step ensuring that any questions or concerns are addressed.

Why should you Lease Your Land for solar?

OYA Renewables offers competitive solar land leases to farmers and other landowners to develop solar projects. Leasing your land for solar supports your family and your community through jobs, income and cleaner air. Developing and building a solar farm takes strong partnerships and expertise to get from start to finish.

Why do we produce the least expensive energy in France?

We produce the least expensive energy in France. Our energy is carbon-free, renewable, unlimited, decentralized, non-relocatable and more than 95% recyclable, contributing to the fight against global warming and supporting the agricultural transition. TSE is a French tech company and a reference in photovoltaics and agrivoltaics.
