Aruba has a very high solar potential and set a renewable energy mix target of 100% by 2030. Presently Aruba's energy mix is comprised of only 19% renewable energy. Its electrical demand peaks at 135MW and its electricity prices are ...

Aruba has a very high solar potential and set a renewable energy mix target of 100% by 2030. Presently Aruba's energy mix is comprised of only 19% renewable energy. Its electrical demand peaks at 135MW and its electricity prices are moderately high relative to the rest of the Caribbean.

Streamlining the solar energy approval process is the first and most crucial step. Encouraging more businesses and homeowners to invest in solar will help Aruba reach its renewable energy goals and attract eco-conscious tourists. Aruba has the potential to be a leader in green energy and sustainable tourism, but decisive action is required today.

Over a decade ago, Aruba moved toward renewable energy by allowing homes and businesses to install solar panels and connect them to the national grid. Elmar, the island's utility company, placed a cap--10 kW for residential and 100 kW for commercial installations--to manage growth without overloading the grid.
