

Who is Solgas energy?

The company has all the skills and resources required for establishing solar energy systems in-house, ranging from electrical engineers, civil engineers, constructors and licensing professionals. At Solgas Energy we plan, deploy and maintain solar photo-voltaic (PV) systems as comprehensive turnkey solutions.

What is Kosovo's solar energy project?

The project is the largest solar energy investment in the district heating sector in the region and one of the largest solar power plants in Europe. As such, the project marks an historic moment on Kosovo's path towards a decarbonised energy system in line with the Paris Climate Agreement.

How much will Germany contribute to Kosovo's solar energy project?

The EU's contribution to solar heating and electricity projects in Kosovo will total almost EUR56 million. "Germany has supported Kosovo in its transition from coal to sustainable energy and decarbonisation in accordance with the objectives of the Green Agenda for the Western Balkans," said Germany's Deputy Ambassador to Kosovo Matthias Conrad.

How will the EU support the energy transition in Kosovo?

The EU will support the energy transition and sustainable development of Kosovo through another 100-megawatt solar electricity project with the Kosovo Energy Cooperation." The EU's contribution to solar heating and electricity projects in Kosovo will total almost EUR56 million.

Will Kosovo become the first economy to use solar power?

Kosovo will become the first economy in the Western Balkans region to use solar power to heat homes. The Ministry of Finance, Labour and Transfers signed a financing agreement on the Solar4Kosovo district heating project on behalf of Kosovo in Pristina today.

This is the first large-scale photovoltaic system in Kosovo that can increase the installed capacity of photovoltaic energy from the current 10.1 MW (2022) to up to 110.1 MW. The project contributes to the achievement of these following United Nations Sustainable Development Goals:

At Solgas Energy we plan, deploy and maintain solar photo-voltaic (PV) systems as comprehensive turnkey solutions. Loyal to our philosophy and business model, we provide top-caliber solutions for all project stages, including: licencing, planning, procurement, equipment supply, system deployment, connection to the electrical grid and ...

JM: What can Zimbabwe expect from Solgas Energy's contribution to the energy sector in the next 10 years?

KK: Our vision is to build a solar power plant in every province to support the government's devolution ...

By increasing the share and capacity of solar energy in power generation, the project will contribute to energy supply security, a faster green transition and economic growth in the region. Upon completion, the plant is expected to produce around 169 GWh of electricity and displace 174 000 tonnes of CO₂ a year on average.

This is the first large-scale photovoltaic system in Kosovo that can increase the installed capacity of photovoltaic energy from the current 10.1 MW (2022) to up to 110.1 MW. The project contributes to the achievement of these following ...

Solar Energy Group signed an agreement with the Transmission, System and Market Operator (KOSTT) of Kosovo* for the connection of its planned 150 MW solar power plant to the grid.

Kosovo's recent Energy Strategy sets an ambitious vision to achieving a just energy transition for the country between 2022-2031. The main pillar of the Strategy is to accelerate renewable ...

At Solgas Energy we plan, deploy and maintain solar photo-voltaic (PV) systems as comprehensive turnkey solutions. Loyal to our philosophy and business model, we provide top ...

INDEPENDENT power producer, Solgas Energy, has commissioned a five megawatt solar power plant and has started feeding into the national grid. The start-up is backed by a US\$7,3 million facility through a joint ...

The district heating project envisages the construction of a solar power plant that uses the sun's energy for central heating. It will also increase heating capacity by expanding the network by 50 MW. The ...

In March 2023, the Kosovo Parliament adopted the Energy Strategy 2022-2031, committing to fully decarbonizing the energy sector.¹⁷ The strategy represents a pivotal step in Kosovo's ...

The district heating project envisages the construction of a solar power plant that uses the sun's energy for central heating. It will also increase heating capacity by expanding the network by 50 MW. The innovative technology enables the collection of solar energy during the summer, its storage and use for central heating during the winter.

INDEPENDENT power producer, Solgas Energy, has commissioned a five megawatt solar power plant and has started feeding into the national grid. The start-up is backed by a US\$7,3 million facility through a joint partnership with Old Mutual.

Kosovo's recent Energy Strategy sets an ambitious vision to achieving a just energy transition for the country between 2022-2031. The main pillar of the Strategy is to accelerate renewable deployment, focused on utility-scale wind and solar PV. Kosovo plans to integrate 1200 MW of RES over the next 10-years. 100 MW Solar Engineering, P ...

By increasing the share and capacity of solar energy in power generation, the project will contribute to energy

supply security, a faster green transition and economic growth in the region. Upon completion, the plant is ...

In March 2023, the Kosovo Parliament adopted the Energy Strategy 2022-2031, committing to fully decarbonizing the energy sector.¹⁷ The strategy represents a pivotal step in Kosovo's energy transition and is focused on five strategic objectives: Improving system resilience; Decarbonization and promoting renewable energy; Increasing energy
