

# Somalia solar battery storage providers

Will a solar power plant in Somalia be 100 MWp?

The company plans to increase the capacity of the solar power plant to 100 MWp in the coming years. A photovoltaic solar power plant is now operational in Mogadishu, the capital of Somalia. The plant was recently commissioned by Beco, Somalia's main electricity supplier.

How can BECO's new solar power plant help Somalia?

Because Somalia struggles with a lack of electricity and high electric costs, BECO's new solar power plant has the potential to positively impact many people's lives. When it opened, the power plant had the capacity to produce 8 MW.

Will BECO expand its solar power plant in Somalia?

The Beco company has the ambition to increase the plant's capacity to 100 MWp, with an investment of 40 million dollars. Pending the expansion of the solar power plant by 2022, the utility will continue to rely on its power generators to supply the Somali capital. The need to invest in battery storage

Can BECO's solar power plant lift Somalis out of poverty?

BECO's solar power plant could have a significant impact on Somalis, lifting many out of poverty. Lack of access to electricity is widely cited as a large contributor to poverty. Without electricity, families don't have a non-polluting source of energy for cooking. Refrigerators are unusable. Children can't do their homework after dark.

Does Somalia have a national electricity grid?

The solar plant also increases the installed capacity of the capital Mogadishu. Beco's facilities provide a total of 35 MW, compared to an estimated demand of 200 MW. Somalia does not have a national electricity grid. It collapsed along with the government at the start of the civil war in 1991.

Does BECO provide electricity in Somalia?

Beco provides electricity in the cities of Mogadishu, Balad, Jowhar, Afgooye, Elasha, Kismayu, Barawe and Marka. According to the U.S. Agency for International Development (USAID), Somalia has an installed capacity of about 106 MW, and most power companies to date rely on diesel generators for electricity generation.

The team will build a solar PV farm of around 2.8 MW with 4.8 MWh of battery storage integrated with synchronised diesel generators. The site is located in the city of ...
