

Are South Sudan & Ethiopia collaborating on regional energy cooperation?

Following a meeting between a delegation from South Sudan's Ministry of Energy and Dams, led by H.E. Minister Peter Marcello and state-owned electric producer, Ethiopian Electric Power, the two countries formally targeted regional energy cooperation, with specifics outlined in a Memorandum of Understanding (MoU).

How much power does South Sudan need?

Meanwhile, with an installed capacity of approximately 130 MW, the majority of which is used to supply power to the country's extensive oil fields, South Sudan is currently evaluating ways to meet its power demand of 300 MW by way of renewable energy prospects.

Will South Sudan replace 11 kV power lines in Juba?

Replacing Juba's 11 kV power lines, the government of South Sudan, has also rolled-out a network of 33 kV lines to connect an additional 20,000 local consumers in Juba.

Does South Sudan have electricity?

The war has destroyed South Sudan's limited infrastructure, triggering an economic implosion. What electricity it has--and it is the least electrified country in the world--depends entirely on imported diesel to run generators.

Is biomass a source of electricity in South Sudan?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. South Sudan: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

Will Ethiopia provide electricity to South Sudan?

Ethiopia is currently targeting an electricity transmission and distribution capacity of more than 70,000 GW, offering scope to supply much-needed electricity to South Sudan, whose electrification rates are amongst the lowest on the African continent.
